 2. with other products rather than as a primary product for sale. As a teenager,
 3. William Wrigley Jr. was working for his father in Chicago selling soap that had
 4. been manufactured in his father's factory. The soap was not very popular with
 5. merchants because it was priced at five cents, and this selling price did not leave a
 6. good profit margin for the merchants. Wrigley convinced his father to raise the
 7. price to ten cents and to give away cheap umbrellas as a premium for the

1. Do you enjoy watching wild animals? They may actually enjoy watching you, too!
2. If you sit still, like a rock, the birds may fly closer, seeing that you are not a threat.
3. Deer may approach you out of curiosity. There are a lot of wild animal “don’ts” but if
4. you are observing right, you’ll have an enjoyable and safe experience, and so will the
5. wild life.
6. The first rule is to avoid disturbing the animals. If a bird appears upset by you, you
7. are probably too close to its nest and may be affecting the survival of its eggs or young.

8. Curiosity may draw you to a bird nest, but beware of the consequences to the
9. inhabitants of the nest. Eggs that are left uncovered will cool quickly, killing
10. the embryos.
11. Second, don't feed the animals. Wild animals who get used to being fed forget how
12. **to fend for** themselves. Human food is bad for animals. Most importantly, wild
13. animals who lose their fear of humans might bite or attack people if they are teased or
14. denied their favorite human treat. A wild animal who attacks a human usually has to be
15. killed.
16. My last rule is don't let your dog chase wildlife. This puts great stress on wild
17. animals, and they may use too much energy trying to escape. Besides, your dog might
18. end up being the victim of a bear or a mountain lion. If you should see an obviously
19. injured animal, report it here at the ranger station. Now, I want to wish you all a
20. pleasant experience in the Thompson National Forest.

 - a) It may cause the death of the babies.
 - b) It may result in a fine.

 - d) It is not the best way to draw the birds.
3. Why is it important not to feed wild animals?
 - a) It might encourage animals to bite or attack people.
 - b) Wild animals usually don't like human food.

4. The phrase **fend for** in line 12 is closest in meaning to

1. The invention of the phonograph happened quite by accident. Thomas Edison
2. moved to Menlo park, New Jersey, in 1876, where he established an industrial
3. research laboratory. There, Edison was working on a carbon telephone transmitter
4. to improve the existing Bell telephone system.
5. In that laboratory a year later, Edison invented the phonograph while he was
6. trying to improve a telegraph repeater. He attached a telephone diaphragm to the
7. needle in the telegraph repeater; in this way, he was able to reproduce a recording
8. that could be played back. After he made some improvements to the machine, he
9. tested it. He recited "Mary Had a Little Lamb" into the machine and played his voice
10. back to a very surprised audience.

1. Many people who are looking to get a pet dog get a puppy. There are many
2. reasons why people get puppies. After all, puppies are cute, friendly, and
3. playful. But even though puppies make good pets, there are good reasons why
4. you should consider getting an adult dog instead.
5. When you get a puppy, you have to teach it how to **behave**. You have to make
6. sure that the puppy is housebroken so that it does not go to the bathroom
7. inside the house. You have to teach the puppy not to jump up on your guests
8. or chew on your shoes. You have to train the puppy to walk on a leash. This is
9. a lot of work.
10. On the other hand, when you get an adult dog, there is a good chance that it
11. will already know how to do all of the previously mentioned things. Many
12. adult dogs have already been housebroken. Many adult dogs will not jump on
13. or chew things that you do not want them to jump on or chew. Many adult
14. dogs will be able to walk on a leash without pulling you to the other side of
15. the street.
16. Puppies also have a lot of energy and want to play all of the time. This can
17. be fun, but you might not want to play as much as your puppy does. Puppies
18. will not always sleep through the night or let you relax as you watch
19. television.
20. On the other hand, most adult dogs will wait on you to play. What is more,
21. they will sleep when you are sleeping and are happy to watch television on the
22. couch right beside you.

23. There is one last reason why you should get an adult dog instead of a
24. puppy. When most people go to the pound to get a dog, they get a puppy. This
25. means that many adult dogs spend a lot of time in the pound, and some never
26. find good homes. So if you are looking to get a dog for a pet, you should think
27. about getting an adult dog. They are good pets who need good homes.

1. The author apparently thinks that puppies are
 - a) bad pets because they take too much work to own
 - b) friendly, playful, and a lot of work
 - c) not as cute as adult dogs
 - d) not as playful as adult dogs
2. As used in paragraph 2, which is the best synonym for **behave**?

2. Independence was signed in 1776, and it was also the first capital of the United
3. States. But one fact about Philadelphia is not so well-known: it is home to
4. nearly 3,000 murals painted on the sides of homes and buildings around the city.
5. In fact, **it is said** that Philadelphia has more murals than any other city in the
6. world, **with the exception of Rome**. How did this come to be? More than 20
7. years ago, a New Jersey artist named Jane Golden started a program pairing
8. troubled youth with artists to paint murals on a few buildings around the city.
9. From this small project, something magical happened. The young people
10. involved helped to create magnificent pieces of art, but there were other,
11. perhaps more important benefits. The young people learned to collaborate and
12. get along with many different kinds of people during the various steps required
13. to paint and design a mural. They learned to be responsible, because they
14. needed to follow a schedule to make sure the murals were completed. They also
15. learned to take pride in their community. It is hard for any resident to see the
16. spectacular designs and not feel proud to be a part of Philadelphia.

17. Take a walk around some of the poorest neighborhoods in Philadelphia,
18. neighborhoods full of broken windows and littered front steps, and you will
19. find beautiful works of art on the sides and fronts of buildings. Of course the
20. murals are not just in poor neighborhoods, but more **affluent** ones as well.
21. Special buses take tourists to different parts of the city to see the various murals,
22. which range from huge portraits of historical heroes, to cityscapes, to scenes
23. depicting the diverse ethnic groups that call Philadelphia home.

24. As a result of its success, the mural program created by Jane Golden has
25. now become the nation's largest public art program and a model for other cities
26. throughout the country seeking to help troubled youth.

1. The main focus of the text is
 - a) an art program designed to help troubled youth
 - b) the many tourists who come to Philadelphia to see murals
 - c) the reasons why Philadelphia is a unique city
 - d) how Jane Golden came up with the idea to start a mural program

2. The phrase **it is said** in line 5 suggests that the author is

4. Which is the best definition of the word **affluent** in line 20?

 - a) there are too many murals in Philadelphia
 - b) the mural program was an inspirational idea
 - c) all troubled youth should learn how to paint
 - d) every city in the country should adopt the mural program

1. Italian adventurer Marco Polo traveled to China near the end of the Middle
2. Ages. He came back to Italy in 1295, after his exciting adventures in China. After
3. his return, he told the Italians about some really new and different things the Chinese
4. were doing.
5. Something new that the Chinese were using was money crafted from paper.
6. Papermoney had been in use in China for hundreds of years when Marco Polo
7. returned to Italy from his **voyage** to China and told his countrymen about it.
8. Why had the Chinese come to use paper money? One possible explanation is
9. related to the supply of metal. Metal is needed to make coins, and the Chinese did
10. not have a big supply of metal to make coins for all of the people in China. The
11. Chinese had already invented paper, and they had already invented a method of
12. printing on paper. When the Chinese needed something to make into money and they

13. did not have enough metal, they used paper to make money.
14. And how do you think the Chinese government got the Chinese people to accept
15. printed paper as money? The Chinese government issued an order saying that the
16. paper money it created was to be used by everyone in China. At first, people were
17. worried that paper money would not have any value, and they did not want to use the
18. paper money. However, the government of China was a very strong government, and
19. people had to follow the order to use paper money. After a while, people saw that
20. they could use paper money to buy anything, and they began to accept paper money.

1. If you live in a house or apartment where utilities are not included in the rent, you
2. are probably aware of the costs of energy consumption. Consider trying to cut energy
3. costs by following these tips.
4. During the winter, more energy is used for heating than anything else. Therefore,
5. you should set your thermostat no higher than 68 degrees. When no one is home, or
6. whenever everyone is sleeping, **turn** the setting **down** to 60 degrees or lower. On sunny
7. days, use the sun's heat by opening draperies and blinds.
8. Hot water uses a lot of energy. Run your dishwasher and clothes washer only when
9. you have a full load. Use warm or cold water for laundry when you can. Take showers
10. instead of tub baths. About half as much hot water is used for a shower. Don't leave
11. the hot water running when rinsing dishes or shaving.
12. The refrigerator operates 24 hours a day, every day, so it is one of the biggest
13. users of energy in your home. Before opening your refrigerator door, pause and think
14. of everything you will need so you do not have to go back several times. When you
15. do open the door, close it quickly to keep the cool air in.
16. Get in the habit of turning off lights when you leave a room, even if you will be
17. gone only for a short time. During the day, try to get along with as few lights as
18. possible. Let the daylight do the work. White or light-colored walls make a room

1. We believe the Earth is about 4.6 billion years old. At present we are forced
2. to look at other bodies in the solar system for hints as to what the early history
3. of the Earth was like. Studies of our moon, Mercury, Mars, and the large
4. satellites of Jupiter and Saturn have provided ample evidence that all these large
5. celestial bodies were bombarded by smaller objects in a wide variety of sizes
6. shortly after the larger bodies had formed. This same **bombardment** must have
7. affected Earth as well. The lunar record indicates that the rate of impacts
8. decreased to its present low level about 4 billion years ago. On Earth,
9. subsequent erosion and crustal motions have obliterated the craters that must
10. have formed during this epoch.
11. Scientists estimate the Earth's age by measuring the ratios of various
12. radioactive elements in rocks. The oldest Earth rocks tested thus far are about 3
13. 1/3 billion years old. But no one knows whether these are the oldest rocks on
14. Earth. Tests on rocks from the moon and on meteorites show that these are
15. about 4.6 billion years old. Scientists believe that this is the true age of the solar
16. system and probably the true age of the Earth.

1. According to the text, how do scientists estimate the age of the Earth?
 - a) By measuring the ratios of radioactive elements in rocks
 - b) By examining fossils
 - c) By studying sunspots
 - d) By examining volcanic activity

2. Scientists estimate the age of the Earth as
 - a) 3 1/3 billion years old.

1. It was previously believed that dinosaurs were cold-blooded creatures, like
2. reptiles. However, a recent discovery has led researchers to believe **they** may
3. have been warm-blooded. The fossilized remains of a 66 million-year-old
4. dinosaur's heart were discovered and examined by x-ray. The basis for the
5. analysis that they were warm-blooded is the number of chambers in the heart as
6. well as the existence of a single aorta.

7. Most reptiles have three chambers in their hearts, although some do have
8. four. But those that have four chambers, such as the crocodile, have two arteries
9. to mix the oxygen-heavy blood with oxygen-lean blood. Reptiles are cold-
10. blooded, meaning that they are dependent on the environment for body heat. Yet
11. the fossilized heart had four chambers in the heart as well as a single aorta. The
12. single aorta means that the oxygen-rich blood was completely separated from
13. the oxygen-poor blood and sent through the aorta to all parts of the body.

14. Mammals, on the other hand, are warm-blooded, meaning that they **generate**
15. their own body heat and are thus more tolerant of temperature extremes. Birds
16. and mammals, because they are warm-blooded, move more quickly and have
17. greater physical endurance than reptiles.

18. Scientists believe that the evidence now points to the idea that all dinosaurs
19. were actually warm-blooded. Ironically, the particular dinosaur in which the
20. discovery was made was a Tescelosaurus, which translates to "*marvelous*
21. *lizard*". A lizard, of course, is a reptile.

1. The word **they** in line 2 refers to

- a) researchers
- b) discoveries
- c) reptiles
- d) dinosaurs

2. According to the author, what theory was previously held and now is being questioned?

- a) That dinosaurs were warm-blooded
- b) That dinosaurs had four-chambered hearts
- c) That dinosaurs were swifter and stronger than reptiles
- d) That dinosaurs were cold-blooded

3. The author implies that reptiles
 - a) have four-chambered hearts.
 - b) have one aorta
 - c) are cold-blooded
 - d) are faster and have more endurance than mammals.

4. The word **generate** in paragraph three is closest in meaning to

1. Some cities are located by chance. A wagon breaks down, the driver spends
2. sometime in repairs, he finds that he is in a **congenial** spot, and settles down.
3. Later another person builds a house nearby, and later someone adds an inn.
4. Someone else starts selling farm products there. Soon there is a little market,
5. which grows to a town, and later to a city. Other places were destined by nature
6. to become cities. London, for example, is on what is called the head of
7. navigation - the point where it becomes too difficult for ocean-going ships
8. to continue upriver, and must transfer their cargoes. As with London, the head of
9. navigation is also the point where the river can be conveniently bridged. In fact,
10. the location of a bridge is often the reason for the birth of a town - as Cambridge
11. or Waybridge in England show. Again, a good harbour will generally lead to a
12. city growing up about it. New York and San Francisco began life as ports, as did
13. Cape Town in South Africa.
14. Some places were created mainly for military purposes, such as Milan, and the
15. host of English cities finishing with - cester, which is derived from *castra* which
16. means camp in Latin. Chester itself, created to guard the Welsh border is a very
17. good example. Other such military bases are Manchester, Doncaster, and of

18. course, Newcastle. A few cities are not created by accident, but by intention.
19. This was the case with Milton Keynes in England, but the most famous
20. examples of such cities are capitals. Brasilia, Canberra and Washington
21. are capitals created in modern times, but even their greatest admirers will admit
22. that they lack a certain character. It is no co-incidence that there are famous pop
23. songs about New York, ("New York, New York"), Chicago ("My kind of
24. Town"), San Francisco (Going to San Francisco") and many other US cities,
25. but none about the nation's capital. On the other hand any Londoner can give

15. In 1897, the company started experimenting with vehicles that ran under

5. taught people about botany and about how **it** could be used to improve farming.
6. Carver learned that there was a problem with cotton farming in the South.
7. Cotton takes nutrients from the soil. If cotton is planted year after year, the
8. quality of the soil decreases. Carver knew that plants like peanuts and sweet
9. potatoes are different from cotton. They add nutrients to the soil rather than take

16. However, when production of peanuts and sweet potatoes increased, a new

1. There has been a lot of **confusion** about Earth's age throughout history.
2. Until the nineteenth century, scientists held a really mistaken belief about the
3. age of our planet. Prior to this time, they had thought that Earth was created
4. around 4,000 or 5,000 B.C.
5. In the middle of the nineteenth century, British physicist Lord Kelvin, the
6. person that the Kelvin temperature scale is named after, came up with a very
7. different idea about Earth's age. His idea may have been well-reasoned, but it
8. was , unfortunately, also incorrect. Lord Kelvin determined Earth's age based
9. upon its temperature. Scientists at the time understood that Earth's center was
10. very hot, much hotter than Earth's surface. Lord Kelvin determined Earth's age
11. by calculating how long it would take the surface to cool down from the

17. Earth's surface. Radioactivity occurs naturally on Earth, and radioactivity
18. creates heat. The naturally occurring radioactivity on Earth has caused Earth to
19. cool **much less swiftly** than Lord Kelvin had calculated. In the twentieth

 9. His plan was to create a worm that was a **cross** between the Asian silkworm
 10. and another type of imported worm that would eat the types of leaves around
 11. Medford. Unfortunately, his plan did not turn out as he wanted. He was not able to

9. merchant ships into warships was not always successful, for a very good reason.

10. The changes that were made to convert a ship from a merchant ship to a
11. warship made the ship much less stable. A heavy cargo in the hold at the bottom
12. of a merchant ship allowed the ship to **stay** balanced in the water. When the
13. cargo was removed, the ship became less stable. Then, when the heavy metal
14. cannons were added to the deck of the ship, the ship became even less stable. **As**

1. Federal Express is a company that specializes in rapid overnight delivery of
2. high-priority packages. The first company of its type, Federal Express was
3. founded by the youthful Fred Smith in 1971, when he was only 28 years old.
4. Smith had actually **developed** the idea for the rapid delivery *Line* service in a
5. term paper for an economics class when he was a student at Yale University.
6. The term paper reputedly received a less-than-stellar grade because of the
7. infeasibility of the project that Smith had outlined. The model that Smith
8. proposed had never been tried; it was a model that was efficient to operate but at
9. the same time was very difficult to institute.
10. Smith achieved efficiency in his model by designing a system that was
11. separate from the passenger system and could, therefore, focus on how to
12. deliver packages most efficiently. His strategy was to own his own planes so
13. that he could create his own schedules and to ship all packages through the **hub**
14. **city** of Memphis, a set-up which resembles the spokes on the wheel of a
15. bicycle. With this combination of his own planes and hub set-up, he could get
16. packages anywhere in the United States overnight.
17. What made Smith’s idea difficult to institute was the fact that the entire
18. system had to be created before the company could begin operations. He
19. needed a fleet of aircraft to collect packages from airports every night and
20. deliver them to Memphis, where **they** were immediately sorted and flown out to
21. their new destinations; he needed a fleet of trucks to deliver packages to and
22. from the various airports; he needed facilities and trained staff all in place to

23. handle the operation. Smith had a \$4 million inheritance from his father, and he
24. managed to raise an additional \$91 million dollars from venture capitalists to get
25. the company operating.
26. When Federal Express began service in 1973 in 25 cities, the company was
27. not an immediate success, but success did come within a relatively short period
28. of time. The company lost \$29 million in the first 26 months of operations.
29. However, the tide was to turn relatively quickly. By late 1976, Federal Express
30. was carrying an average of 19,000 packages per night and had made a profit of
31. \$3.6 million.

11. Rather than one language, the Celtic languages consist of two distinct clusters:
12. the Gaelic group and the Brythonic group. These two clusters of languages most
13. likely developed from dialects of the same language, the language of the Celts in
14. their original homeland. These two dialects were most likely mutually intelligible
15. to some degree as late as the fourth century. The Gaelic group of Celtic languages

16. consists of Irish, Scottish, and Manx, the language of the Isle of Man. The
17. Brythonic group of Celtic languages includes Welsh, Cornish, Breton, and Gaulish,
18. the language of Gaul prior to the days of the Roman Empire, with its Latin-
19. speaking population.
20. Many, though not all, of the Celtic languages are either extinct or are in the
21. process of becoming extinct. Gaulish apparently disappeared around 600 A.D.
22. Cornish and Manx both actually became extinct, the former in the nineteenth
23. century and the latter just a few decades ago, but both are being revived and are
24. now taught in a few schools each. Scottish, Irish, and Breton are all declining in
25. use. There are under a hundred thousand speakers of Scottish Gaelic, mostly on the
26. northern Hebridean Islands; there are more than a hundred thousand speakers of
27. Irish, **mainly** in the western counties of Ireland; there are about a half million
28. speakers who use Breton on a daily basis. In all these situations, though, the rate of
29. transmission to new generations is low, and this does not bode well for the survival
30. of these languages. Of all the Celtic languages, perhaps only Welsh has a strong
31. hold on the future.

1. The author's purpose in the text is to
 - a) describe the past and present of a related set of languages.
 - b) list the major characteristics of Celtic languages.

2. According to the text, the Celtic languages did **NOT**
 - a) develop from the Indo-European language family
 - b) originate in the British Isles
 - c) exist before the time of the Roman Empire
 - d) provide any Italian place names

3. The text states that the Celts were
 - a) peaceful farmers
 - b) unheard of during the Bronze Age
 - c) at their peak during the Iron Age
 - d) at the height of their civilization 1,500 years ago

-
4. The expression **fanned out** in line 6 could best be replaced by
- a) spread out
 - b) called off
 - c) got lost
 - d) turned out
5. It is implied in the text that Gaulish
- a) first surfaced after the Roman Empire
 - b) has been revived in the last century

9. The word **mainly** in line 27 is synonymous to
- a) finally
 - b) usually

1. Perhaps better known than the Cullinan Diamond is the Hope Diamond, a
2. valuable and rare blue gem with a background of more than 300 years as a
3. world traveler. The 112-carat blue stone that later became the Hope Diamond
4. was mined in India sometime before the middle of the seventeenth century
5. and was first known to be owned by Shah Jahan, who built the TajMahal in
6. memory of his beloved wife. From India, the celebrated blue stone has changed
7. hands often, moving from location to location in distant corners of the world.
8. In the middle of the seventeenth century, a trader from France named Jean
9. Baptiste Tavernier acquired the large blue diamond, which was rumored to have
10. been illegally removed from a temple. Tavernier returned to France with the big
11. blue gem, where the stone was **purchased** by the Sun King, Louis XIV. Louis
12. XIV had **it** cut down from 112 to 67 carats to make its shape symmetrical and to
13. maximize its sparkle. The newly cut diamond, still huge by any standards, was
14. passed down through the royal family of France, until it arrived in the hands of
15. Louis XVI and Marie Antoinette. During the French Revolution, Louis XVI and
16. his wife met their fate on the guillotine in 1793, and the big blue diamond
17. disappeared from public sight.
18. The diamond somehow managed to get from France to England, where
19. banker Henry Hope purchased it from a gem **dealer** early in the
20. nineteenth century. The huge blue stone was cut into a 45.5-carat oval,
21. and at this point it took on the name by which it is known today. The
22. diamond stayed in the Hope family for around a century, when deep
23. indebtedness brought on by a serious gambling habit on the part of one
24. of Henry Hope's heirs forced the sale of the diamond.
25. From England, the Hope Diamond may have made its way into the
26. hands of the Sultan of Turkey; whatever route it took to get there, it
27. eventually went onto the United States when American Evelyn Walsh
28. McLean purchased it in 1911. Mrs. McLean certainly enjoyed showing

29. the diamond off. The guests in her home were sometimes astounded to
30. notice the huge stone embellishing the neck of Mrs. McLean's Great Dane
31. as the huge pet trotted around the grounds of her Washington, D.C.
32. home. The Hope Diamond later became the property of jeweler Harry
33. Winston, who presented the stunning 45.5-caratpiece
34. to the Smithsonian in 1958. The Hope Diamond is now taking a well-
35. earned rest following its rigorous travel itinerary and is on display at the
36. Smithsonian Institution in Washington, D C. where it has been since
37. 1958.

1. The locations of stars in the sky relative to one another do not appear to the
2. **naked eye** to change, and as a result stars are often considered to be fixed in
3. position. Many unaware stargazers falsely assume that each star has its own
4. permanent home in the nighttime sky. In reality, though, stars are always
5. moving, but because of the tremendous distances between stars themselves and
6. from stars to Earth, the changes are barely **perceptible** here. An example of
7. a rather fast-moving star demonstrates why this **misconception** prevails; it
8. takes approximately 200 years for a relatively rapid star like Bernard's star to
9. move a distance in the skies equal to the diameter of the earth's moon. When the
10. apparently **negligible** movement of the stars is contrasted with the movement of

1. Charles Lutwidge Dodgson is perhaps not a name that is universally
2. recognized, but Dodgson did achieve enormous success under the pseudonym
3. Lewis Carroll. He created this pseudonym from the Latinization, *Carolus*
4. *Ludovicus*, of his real given names. It was under the name Lewis Carroll that
5. Dodgson published the children's book *Alice's Adventures in Wonderland*
6. (1865) and its sequel *Through the Looking Glass* (1872). Though Dodgson
7. achieved this success in children's literature, he was not an author of children's
8. books by training or profession. His education and chosen field of pursuit were
9. far removed from the field of children's literature and were instead focused on
10. theoretical mathematics.

11. Dodgson graduated with honours from Christ Church, Oxford, in 1854 and
12. then embarked on a career in the world of academia. He worked as a lecturer
13. in mathematics at Oxford and, later in his career, published a number of
14. theoretical works on mathematics under his own name rather than under the
15. pseudonym that he used for his children's stories. He produced a number of
16. texts for students, such as *A Syllabus of Plane Algebraical Geometry*
17. (1860), *Formulae of Plane Trigonometry* (1861), which was **notable** for the
18. creativity of the symbols that he used to express trigonometric functions such
19. as sine and cosine, and *A Guide for the Mathematical Student* (1866). In a
20. number of more esoteric works, he championed the principles of Euclid; in
21. *Euclid and His Modern Rivals* (1879), he presented his ideas on the superiority
22. of Euclid over rival mathematicians in a highly imaginative fashion, by devising
23. a courtroom trial of anti-Euclid mathematicians that he named "Euclid-
24. wreckers" and ultimately finding the defendants guilty as charged. *Curiosa*
25. *Mathematica* (1888-1893) made a further defense of Euclid's work, focusing
26. on Euclid's definition of parallel lines. These academic works never had the
27. universal impact of Dodgson's works for children using the name Lewis Carroll,
28. but **they** demonstrate a solid body of well-regarded academic material.

 - d) Dodgson and Carroll: mathematics and children's stories

2. According to the text, Dodgson
 - a) did not use his given name on his stories for children
 - b) used the same name on all his published works

2. Esperanto is what is called a planned, or artificial, language. It was
3. created more than a century ago by Polish eye doctor Ludwik Lazar
4. Zamenhof. Zamenhof believed that a common language would help to
5. alleviate some of the misunderstandings among cultures.
6. In Zamenhof's first attempt at a universal language, he tried to create a
7. language that was as uncomplicated as possible. This first language included
8. words such as *ab*, *ac*, *ba*, *eb*, *be*, and *ce*. This did not result in a workable
9. language in that these monosyllabic words, though short, were not easy to
10. understand or to retain.
11. Next, Zamenhof tried a different way of constructing a **simplified**
12. language. He made the words in his language sound like words that people
13. already knew, but he simplified the grammar tremendously. One example of
14. how he simplified the language can be seen in the suffixes: all nouns in this
15. language end in *o*, as in the noun *amiiko*, which means "friend", and all
16. adjectives end in *-a*, as in the adjective *bela*, which means "pretty". Another

17. example of the simplified language can be seen in the prefix *mal-*, which
18. makes a word opposite in meaning; the word *malamiko* therefore means
19. “enemy,” and the word *malbela* therefore means “ugly” in Zamenhof’s
20. language.
21. In 1887, Zamenhof wrote a description of this language and published
22. it. He used a penname, Dr. Esperanto, when signing the book. He selected the
23. name Esperanto because this word means “a person who hopes” in his
24. language. Esperanto clubs began **popping up** throughout Europe, and by
25. 1905 Esperanto had spread from Europe to America and Asia.
26. In 1905, the First World Congress of Esperanto took place in France, with
27. approximately 700 attendees from 20 different countries. Congresses were
28. held annually for nine years, and 4,000 attendees were registered for the
29. Tenth World Esperanto Congress scheduled for 1914, when World War I
30. erupted and forced its cancellation.
31. Esperanto has had its **ups and downs** in the period since World War I.
32. Today, years after it was introduced, it is estimated that perhaps a quarter of
33. million people are fluent in it.
34. Current advocates would like to see its use grow considerably and are
35. taking steps to try to make this happen.

- a) understandable
 - b) uncomplicated
 - c) underestimated
 - d) natural

-
4. It can be inferred from the text that the Esperanto word *malespera* means
- hopelessness
 - hope
 - hopeless
 - hopeful
5. The expression **popping up** in paragraph 4 could best be replaced by
- leaping
 - shouting
 - hiding
 - opening
6. In which paragraph does the author explain why Zamenhof chose the name that he did for his language?
- Paragraph 1-2
 - Paragraph 3

7. It can be inferred from the text that the Third World Congress of Esperanto took place
- in 1905
 - in 1907

- tops and bottoms
 - floors and ceilings
 - take offs and landings
 - highs and lows

2. hatred for humanity. Although the rattlesnake is indeed a venomous snake
3. capable of killing a human, its nature has perhaps been **somewhat** exaggerated in
4. myth and folklore.
5. The rattlesnake is not inherently aggressive and generally strikes only when **it**
6. has been put on the defensive. In its defensive **posture** the rattlesnake raises the
7. front part of its body off the ground and assumes an S-shaped form in preparation
8. for lunge forward. At the end of a forward thrust, the rattlesnake pushes its fangs
9. into the victim, thereby injecting its venom.
10. There are more than 30 species of rattlesnakes, varying in length from 20
11. inches to 6 feet. In the United States there are only a few deaths annually from

1. A solar eclipse occurs when the Moon moves in front of the Sun and hides at
2. least some part of the Sun from the earth. In a partial eclipse, the Moon covers
3. part of the Sun; in an annular eclipse, the Moon covers the center of the Sun,
4. leaving a bright **ring** of the light around the Moon; in a total eclipse, the Sun is
5. completely covered by the Moon.
6. It seems rather improbable that a **celestial body** size of the Moon could
7. completely **block out** the tremendously immense Sun, as happens during a total
8. eclipse, but this is exactly what happens. Although the Moon is considerably
9. smaller in size than the Sun, the Moon is able to cover the Sun because of their
10. **relative** distances from Earth. A total eclipse can last up to 7 minutes, during
11. which time the Moon's shadow moves across Earth at a **rate** of about 6
12. kilometers per second.
1. This text mainly
- a) describes how long an eclipse will last

5. What is the meaning of **block out** in line 7?
- a) square
 - b) cover
 - c) evaporate
 - d) shrink
6. According to the text, how can the Moon hide the Sun during a total eclipse?
- a) The fact that the Moon is closer to Earth than the Sun makes up for the Moon's smaller size.
 - b) The Moon can only obscure the Sun because of the Moon's great distance from the earth.
 - c) Because the Sun is relatively close to Earth, the Sun can be eclipsed by the Moon.
 - d) The Moon hides the Sun because of the Moon's considerable size.
7. The word **relative** in line 10 could best be replaced by

1. What is commonly called pepper in reality comes from two very
2. different families of plants. Black and white pepper both come from the fruit
3. of the *Piper nigrum*, a vine with fruits called *peppercorns*. The peppercorns
4. **turn** from green to red as they ripen and finally blacken as they dry out. The
5. dried-out peppercorns are ground to obtain black pepper. White pepper,
6. which has a more subtle flavor than black pepper, comes from the same
7. peppercorns as black pepper; to obtain white pepper, the outer hull of the
8. peppercorn, the pericarp, is removed before the peppercorn is ground.
9. Red and green peppers, on the other hand, come from a completely
10. different family from black and white pepper. Red and green peppers are
11. from the genus *Capsicum*. Plants of this type generally have tiny white
12. flower and fruit which can be any one of a number of colors, shapes, and
13. sizes. These peppers **range** in flavor from very mild and sweet to the most
14. incredibly burning taste imaginable.
15. Christopher Columbus is responsible for the present-day confusion over
16. what a pepper is. The *Piper nigrum* variety of pepper was highly valued for

17. centuries, and high demand for pepper by Europeans was a major cause of
18. the fifteenth-century **push** to locate ocean routes to the spice-growing
19. regions of Asia. When Columbus arrived in the New World in 1492, he was
20. particularly interested in finding black pepper because of the high price that
21. it would command in Europe. Columbus came across plants from the
22. *Capsicum* family in use among the people of the New World, and he
23. incorrectly identified **them** as relatives of black pepper. Columbus
24. introduced the spicy *Capsicum* chili peppers to Europeans on his return from
25. the 1492 voyage, and traders later spread them to Asia and Africa. These
26. *Capsicum* peppers have continued to be called peppers in spite of the fact
27. that they are not related to the black and white pepper of the *Piper nigrum*
28. family.

1. The purpose of this text is
 - a) to explain why there is confusion today over peppers
 - b) to provide the scientific classification of various types of peppers
 - c) to demonstrate that it was Columbus who brought peppers to Europe
 - d) to classify the variety of sizes, shapes, and colors of peppers
2. The word **turn** in paragraph 1 could best be replaced by
 - a) revert
 - b) exchange
 - c) veer
 - d) change
3. According to the text, both black and white peppers
 - a) come from different plants
 - b) change colors after they are ground
 - c) are ground from dried out peppercorns
 - d) have the same flavor

Albert Einstein is known all over the world as a brilliant theoretical physicist and the founder of the theory of relativity. _____. Some of his ideas made possible the atomic bomb, as well as television and other inventions.

He was born in 1879 in a small German town. _____. Neither his parents nor his schoolteachers thought much of his mental abilities. His uncle often joked; “Not everybody is born to become a professor.”

In 1895 Albert failed the entrance examination to a technical college in Zurich. _____. After graduating the college, Einstein started to work at the Swiss Patent Office in Bern. In 1905 he wrote a short article in a science magazine. _____. Later he became a professor in several European Universities and in 1914 moved to Berlin as a member of Prussian Academy of Sciences. After ten years of hard work he created his “General Theory of Relativity.” In 1921 Einstein received the Nobel Prize for Physics. A Jew, and the pacifist, he was attacked by the Nazis and when Hitler came to power in 1933 he decided to settle in the United States.

In 1939 Albert Einstein wrote a letter to President Roosevelt, at the request of several prominent physicists, outlining the military potential of nuclear energy and the dangers of Nazis lead in this field. His letter greatly influenced the decision to build an atomic bomb, though he took no part in Manhattan Project. After the war he spoke out passionately against nuclear weapons and repression. Einstein died in 1955.

_____.

- 1) A year later, however, he managed to pass the exam and entered the college.

- 6) This was his “Special Theory of Relativity”.
- 7) The Einstein family soon moved to Munich, where Albert went to school.
